- UVC light mimics cleansing nature of sunlight
- Reduces dirt and dust from the air
- Negatively charged ions reduce small particles and airborne pollutants

SO WHAT IS ACTIVEPURE® TECHNOLOGY?

ActivePure is based on technology originally developed by NASA. It is proven to reduce up to 99% of surface micro-organisms and dramatically reduce airborne contaminants and allergens in the air.

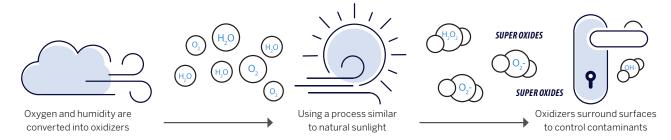

HOW ACTIVEPURE® WORKS

ActivePure has been proven to reduce and eliminate viruses, bacteria and allergens in the air and on every surface.

It works by harnessing microscopic oxygen and water molecules in the air that then go through our purification units. which are equipped with an ActivePure honeycomb matrix.

While inside the matrix, the molecules are transformed into friendly-yet-powerful oxidizers. As they're released back into the air, these supercharged ActivePure molecules seek and rapidly destroy contaminants, fungi, mold, and odorcausing bacteria – even ones that try to hide in hard-to-reach places.
